“ Being a Business College Graduate in Information Technology and having a Bachelor's Degree in Business Information Systems, I'm able to understand today's technology and business and make my own conclusions how things are run. Aside from that, I'm also a self-taught graphic & web designer, creating designs that really stand out from the rest. I'm not all about making-things-pretty, though. I also build what I design.

Venturing into software development, I'm currently working as a Software Engineer, building complex mobile and web applications for prestigious clients.

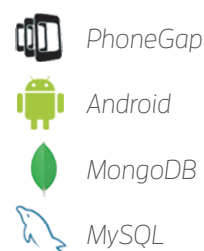

Now, mix that with my creative, imaginative and open-minded personality and you get a person who really represents something new and fresh.

Expertise

Creative

Development

Work Experience

Gofore Oy

Software Engineer
June 2014 - present

Leonidas Oy

UI / UX Designer
December 2013 - June 2014
